

DIVYANSHU RAJ

THREAT HUNTER | AI-ASSISTED SECURITY ANALYTICS | SOC ANALYST | VULNERABILITY MANAGEMENT

New Delhi, India (Open to relocate) | +91-9888642815 | divyanshuraj144@gmail.com | linkedin.com/in/divyanshuraj144

PROFESSIONAL SUMMARY

Threat-hunting and security-operations professional with approximately 4+ years of overall experience, including 3+ years in cybersecurity across enterprise threat hunting, incident investigation, threat intelligence, vulnerability management and security consulting. Hands-on experience hunting across endpoint, identity, Microsoft 365, email, firewall, Windows/Linux, server and network telemetry using Elastic SIEM/Kibana, Palo Alto Cortex XDR and Palo Alto NGFW. Supports an environment of approximately 800 users, 700 endpoints and 36+ servers. Applies Claude Code, OpenAI and similar LLM tools in controlled proof-of-concept workflows for hunt hypothesis generation, query development, Python automation, IOC extraction, ATT&CK mapping, investigation summarization and hunt-to-detect conversion, with analyst validation, secure data handling and human approval for response actions.

CORE COMPETENCIES

- **Threat Hunting & Incident Response:** Hypothesis-Driven Threat Hunting, Proactive and Reactive Hunting, Incident Investigation, Alert Triage, Attack Timeline Reconstruction, Root Cause Analysis, Host Triage, Process-Tree Analysis, IOC/IOA Analysis, Evidence Collection, Containment and Remediation
- **AI-Assisted Security Operations:** Claude Code, OpenAI/LLM-Based Security Workflows, Prompt Engineering, AI-Assisted Hunt Hypothesis Generation, Natural-Language-to-Query Generation, Security Event Summarization, Alert Correlation, IOC Enrichment, Detection Logic Generation, Human-in-the-Loop Validation
- **Generative AI Concepts:** OpenAI API, Claude API Concepts, Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, Agentic Workflows, Tool Calling, Structured Outputs, AI Guardrails, Prompt-Injection Awareness, Model Output Validation
- **SIEM, EDR & Security Platforms:** Elastic SIEM, Kibana, Palo Alto Cortex XDR, Microsoft Defender XDR, Microsoft Sentinel, Palo Alto NGFW, Microsoft 365 Security, Active Directory, Windows Event Logs, Sysmon
- **Hunting & Detection Languages:** KQL, XQL, ES|QL, EQL, Sigma, SPL, SQL, Lucene, YARA Fundamental
- **Automation & Scripting:** Python, PowerShell, Regex, Security Data Parsing, IOC Automation, Query Automation, Investigation Workflow Automation
- **Threat Detection & Analytics:** Behavioral Analytics, Anomaly Detection, UEBA Concepts, Detection Engineering, Detection Rule Creation and Tuning, False-Positive Reduction, Multi-Source Event Correlation, Baseline Analysis, Hunt-to-Detection Conversion
- **Threat Intelligence:** Cyber Threat Intelligence, OSINT, Threat Actor TTP Analysis, IOC Enrichment, Malware Behavior Analysis, Threat Intelligence Reporting, Vulnerability Intelligence, MITRE ATT&CK Mapping
- **Telemetry & Log Analysis:** Endpoint, Identity, Authentication, Microsoft 365, Email, DNS, Firewall, VPN, Proxy, Network, Windows, Linux, Server, Application and Cloud Security Telemetry
- **Vulnerability & Security Testing:** Nessus Professional, Burp Suite Professional, Acunetix, OpenVAS, Nmap, SQLMap, Metasploit, OWASP Top 10, Vulnerability Validation, Risk-Based Prioritization
- **Security Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework, ISO/IEC 27001, CIS Controls, Cyber Kill Chain, CERT-In Guidelines

PROFESSIONAL EXPERIENCE

Senior Engineer - Infosec & Cybersecurity | Hindustan Power Projects Pvt. Ltd. (MBPower Group) | New Delhi | Dec 2025 - Present

- Design and execute hypothesis-driven threat hunts across endpoint, identity, Microsoft 365, email, firewall, server and network telemetry for approximately 700 endpoints, 36+ servers and 800 users.
- Investigate approximately 150+ high-priority alerts per month using Elastic SIEM/Kibana and Cortex XDR; correlate process trees, command lines, authentication events, email activity, DNS/network connections and firewall sessions to determine scope, impact and attack path.
- Develop hunts for suspicious PowerShell and LOLBin activity, credential misuse, persistence, anomalous sign-ins, lateral movement, command-and-control, unusual outbound traffic and potential data exfiltration; map evidence to MITRE ATT&CK.
- Use Claude Code, OpenAI and related AI tools in controlled lab/POC workflows to generate and review hunting queries, refactor Python analysis scripts, extract IOCs, summarize event clusters and convert validated behavioral patterns into detection logic.
- Operate a hunt-to-detect workflow by translating confirmed TTPs, IOCs and investigation logic into reusable SIEM queries, SOC use cases, rule-tuning recommendations, response checklists and coverage improvements.
- Validate telemetry quality across Windows, Microsoft 365, Palo Alto NGFW, Cisco and Cortex XDR data sources; identify missing events, parsing issues, timestamp inconsistencies and visibility gaps that could weaken AI or analyst conclusions.
- Enrich investigations with OSINT, CERT-In/CSIRT advisories, vendor intelligence, malicious domains/IPs/hashes and vulnerability context; prioritize findings using threat confidence, asset criticality, exposure and business impact.
- Supported containment of high-impact denial-of-service behavior and suspected lateral exploitation by correlating endpoint, firewall and SOC evidence and coordinating hardening, monitoring and post-action validation.
- Provide weekly hunt, incident, vulnerability, risk and security-control updates to the CIO and vCISO; coordinate actions with SOC/MSSP, infrastructure, network, application, SAP, vendor and business stakeholders.

Consultant - SOC & VAPT Analyst (Promoted from Junior VAPT Analyst) | F9 Cybrisk Tech Pvt. Ltd. | India | Apr 2025 - Nov 2025

- Reviewed approximately 120+ security alerts per month across endpoint, application, authentication, network, server and infrastructure environments; validated suspicious activity, gathered evidence and provided customer-ready containment and remediation guidance.
- Supported investigation of approximately 15+ confirmed security issues per quarter using endpoint, authentication, application, network, vulnerability and threat-intelligence evidence.
- Led 20+ web, API, network and infrastructure assessments using Burp Suite Professional, Nessus, Acunetix, OpenVAS, Nmap, SQLMap and Metasploit; validated 100+ findings and eliminated 30+ scanner-generated false positives.
- Researched emerging CVEs, public exploits, attacker infrastructure and TTPs; mapped relevant behaviour to MITRE ATT&CK and translated findings into investigation reports, remediation priorities and retest evidence.
- Created repeatable testing checklists, technical reports, executive summaries and remediation trackers while collaborating with clients and technical owners through closure.

IT Security Analyst | Skilloptic | Pune, India | Mar 2023 - Mar 2025

- Conducted security monitoring, threat analysis, incident investigation and vulnerability validation across enterprise systems, endpoints, networks and web applications.
- Analyzed suspicious IP addresses, domains, URLs, file hashes, authentication activity and behavioural indicators using OSINT and threat-intelligence sources; documented IOCs and ATT&CK mappings.
- Gained practical exposure with the Pune Cyber Crime Team supporting cyber-threat research, digital-investigation activities, attacker-behaviour analysis, IOC tracking, evidence documentation and investigation reporting.

Planning Engineer | Earlier Career Experience | Barmer, India | Approx 1 year

- Supported mechanical planning and execution activities in a refinery environment, including maintenance scheduling, manpower and material coordination, progress monitoring, work documentation, and coordination with engineering, operations, contractors, and site teams to ensure timely and safe completion of mechanical works.

AI – ASSISTED THREAT HUNTING PROJECTS

LLM-Assisted Threat Hunting Workflow - Lab / Proof of Concept

- Designed an end-to-end workflow covering telemetry selection and normalization, hunt hypothesis generation, LLM-assisted query creation, multi-source correlation, analyst validation, ATT&CK mapping, risk prioritization and conversion into durable detections.
- Used Claude Code and OpenAI-based tools to generate, explain and refine KQL, XQL, ES|QL/EQL and Sigma-style logic; develop Python utilities for log parsing, IOC extraction, event grouping and structured investigation summaries.
- Defined a retrieval-augmented generation approach using trusted threat-intelligence reports, internal runbooks, field schemas and detection content so the model is grounded in approved context rather than unrestricted output.
- Applied safeguards for schema mismatch, hallucination, prompt injection, sensitive-log exposure and unsafe automation; required human validation of queries, findings and all containment or destructive response actions.

REPRESENTATIVE THREAT-HUNTING SCENARIOS

- **Identity compromise:** correlate Entra/Microsoft 365 sign-ins, mailbox activity, endpoint logons, MFA events and privilege changes to determine whether valid accounts are being abused.
- **Execution and persistence:** identify suspicious Office-to-PowerShell chains, encoded commands, LOLBin abuse, WMI, scheduled tasks, services, registry run keys and unusual parent-child process relationships.
- **Lateral movement and command-and-control:** correlate SMB/RDP/WinRM authentication, remote-service activity, rare destinations, DNS patterns, beaconing and firewall traffic to reconstruct cross-host attack paths.
- **Potential data exfiltration:** combine endpoint file access, DLP events, cloud/email activity, network transfer volume and destination reputation to distinguish legitimate business use from suspicious movement.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google Cybersecurity Professional Certificate | Google Junior Cybersecurity Analyst | Fortinet Certified Associate | FortiGate Operator v7.4 | Cisco Networking Academy | Skilloptic Cyber Security Certification Training
Planned: CISSP | GIAC Machine Learning Engineer for Cybersecurity — GMLE | GIAC Cyber Threat Intelligence — GCTI
